

Compatible with G600B and G600B-C Series

The G600 and G600B-C systems are most compatible with microwave range hoods, or with range hoods that have a ferromagnetic underside that has an entirely flat filtration bank. The G600B-C is the **ONLY** system that works with hoods in mobile applications like RV's and Boats.

The Broan QP and QS series are examples of hoods that work well with the G600B and G600B-C systems.
